

AMENDMENTS TO THE SPECIFICATION

Please delete the Abstract on page 50 and replace as follows:

A spatial-to-temporal data transmission and translation system can publish a schedule of content transmission, the schedule identifying the content by one or more times. At least one content can be read from at least one spatial data storage system in a fashion independent of the schedule of content transmission. At least one content can be transmitted to a temporal data storage system in accord with the published schedule.
